Sir:

Margaret Rogers - April 28, 2005

Responsive to the Office Action of October 28, 2004, please amend this
application as follows:

In the Claims:

Claim 11. (Amended) A device for transdermic administration of two active
ingredients (I) and (II) comprising a compartment (A) containing an adhesive polymer
matrix containing active ingredient (I) and optionally at least one additive, a compartment
(B) containing an adhesive polymer matrix containing active ingredient (II) and
optionally at least one additive, each polymer matrix being ~~rapidly~~ covered with
individual protective film (a) and a'), compartments (A) and (B) being supported on a
peel-off protective film (b) at a distance of 1 to 10 mm apart.

Already paid

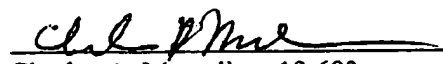

acetate copolymer matrix and the Examiner deems it would have been obvious to use such a matrix in the primary references.

Applicants respectfully traverse these grounds of rejection since the said references in no way teach applicant's invention and one skilled in the art cannot combine the primary, secondary and third references as the Examiner has done without the benefit of applicant's disclosure. The '452 patent merely teaches the specific ingredients used by the applicants and does not overcome the deficiency's of the primary and secondary references. The '772 reference only teaches a specific copolymer which does not overcome the deficiencies of the primary references and therefore withdrawal of these grounds of rejections is requested.

In view of the amendments to the claims and the above remarks, it is believed that the claims clearly point out applicant's patentable contribution and favorable reconsideration of the application is requested.

Should any extension of time or fees be necessary in order to maintain this Application in pending condition, appropriate requests are hereby made and authorization is given to debit account # 02-2275.

Respectfully submitted,
Muserlian, Lucas and Mercanti
